seamless white moulded sinks and drainer grooves

seamless covered upstands

seamless slab ends

seamless curves in any size

a choice of front edge profiles: example - shark's nose

seamless window boards

backsplash

recessed sink drainer

FEATURES AND BENEFITS

Seamless joins give the appearance of one solid work surface with inconspicuous joins no matter how long or wide.

The non-porous hygienic surface is an ideal material that is resistant to moisture, bacteria and staining - making it easy to clean and maintain.

Guaranteed colour matching, with colour consistency throughout, make it an ideal surface for your kitchen.

The complete template, fabricate and install service for our **bespoke solid surface worktops** ensures minimal disruption in the home during installation.

Slab ends with a seamless return to the floor give kitchens a contemporary finish.

Seamless curves in any size can accurately follow the line of any curved unit. Select worktops are fabricated with a seamless inner radius at every change of direction - there are no corner joins.

Seamless covered upstands are available in any size up to 600mm high.

The seamless look continues into the window area with the option of **seamless window boards**.

Backsplashes in the same colour complete the look behind sinks and hobs.

Contemporary solid surface sinks with stainless steel bases are available in every colour to match your worktop.

Seamless white moulded sinks and drainer grooves are available as single bowl or 1½ bowl sinks.

Recessed drainers give sink areas a clean and sophisticated look.

Front edge depth ranges from a 12mm stepped edge to over 100mm.

The choice of **front edge profiles** includes pencil edge, square edge, no-drip edge, stepped edge, bullnose, and shark's nose.

WHARF SELECT SEAMLESS WORKTOPS

Wharf Select seamless, the ultimate in luxury solid surface worktops. Select is an exclusive brand only available through an approved network of kitchen showrooms and is fabricated using the latest digital technology to ensure quality and precision throughout.

Wharf Select Solaris C003 worktops

Wharf Select Solaris C003 featuring a breakfast bar with solid surface legs, covered upstands and backplash.

Contact your kitchen showroom for a complete Select experience.

Wharf Select Veined Colours

Veined colours have random and complex patterns that create visually stunning work surfaces. This individuality means some key points must be considered when selecting these colours:

- The veining on each sheet is unique.
- Any seam or change of direction will create a visual break in the veining.
- The veining on the edge of a sheet will be different to that on the face.
- Cutting into the surface will reveal differences in the pattern. This will be most noticeable when covered upstands and recessed drainers are specified.

Ivory Marl, Taupe Marl and Grey Marl are representations of veined colours.

Swatches show how veining might appear on a 600mm deep worktop.
